Atto Pharma
MANUFACTURING SIMPLIFIED

ATTO PHARMA EBMR · AI AGENTS

An agent for every role, from the first question to the daily batch.

Ask in your own words, on your own device. Help agents guide your evaluation, set-up, training and rollout; agents on your records answer the floor, QA and management in seconds, with charts and your own SOPs.

EVALUATE, SET UP AND TRAIN: THE HELP AGENTS

Sales
PLANT HEADS, MANAGERS

What the eBMR does, the pilot, validation, security, Part 11 and the documents.

How does the pilot become production?

IT & Security
IT HEAD, IT AND QUALITY STAFF

Hosting, sign-in and two-step sign-in, access, data separation, backups, audit trail, validation.

How are our records kept apart?

Implementation
ADMINISTRATORS, HEADS

Loading your BMRs, people, equipment, labels, cleaning, eLogbooks, the first batch, OQ and PQ.

How do I load a second BMR?

Company Admin
YOUR COMPANY'S ADMINISTRATOR

Which certifications and modules each role needs, in what order; each role's screens and which are required.

What does a dispensing operator need?

My role
EVERYONE, EVERY ROLE

Your own path: what to study next, your certificate, the rehearsal, your screens in the order of a batch day.

What trainings do I take, in what order?

Support
EVERYONE

What a message means and how to fix it yourself; a support ticket with the conversation when you need us.

Why can't I sign this step?

RUN THE BATCHES: THE AGENTS ON YOUR RECORDS

Quality
QA HEAD, IPQA

Batches to review, open exceptions, corrections, deviations, signatures; a review summary per batch; trends across batches.

Review summary for batch 301

Manufacturing
MANUFACTURING HEAD, SUPERVISORS

Where every batch is and what is next, WIP, equipment fit for use, calibration and maintenance due.

What is waiting for QA release?

Dispensing
WAREHOUSE

Booths in use and cleaned, balances at a booth, material lots, expiry and retest, who is certified to dispense.

Which booths are not cleaned?

Each operation's own agent
PRODUCTION OPERATORS AND SUPERVISORS

Granulation & blending · Compression & encapsulation · Coating · Packing & inspection: the batches at their stage, their out-of-limit values and corrections, and procedures answered from that operation's SOPs.

Charts and your SOPs
EVERYONE ON THE FLOOR

"RH trend area-wise for 30 days", "balances calibrated vs due", "yield trend across batches": a chart with its records. Procedures quoted from your own SOP, with its number and version. Short forms and Hinglish work.

THROUGH THE ROLLOUT

Stage	Who asks	Agents
Pilot & evaluation	Plant head, QA Head, IT Head	Sales, IT & Security
Set-up	Administrator, Manufacturing and QA Heads	Implementation, Company Admin, Support
Training & rehearsal	Every person, in waves	My role, Support (with the study guides, manual and videos)
OQ, PQ & go-live	QA Head, IT Head, Manufacturing Head	Implementation, IT & Security, Quality
Every batch day	QA, production, warehouse, engineering	Quality, Manufacturing, Dispensing, the operations' agents

SAFE BY DESIGN

Your records stay yours
The record agents read through your own sign-in, in your browser or on an AI box on your network. No record goes to an AI company.

They can't change anything
Agents answer; they never record, sign or edit. The batch's screens and audit trail stay the record.

Help agents see no batch records
They answer from the published manual, guides and documents; emails and numbers in questions are masked.

They learn your words
Pick the right reading of a question once and your company's devices answer it that way from then on.

Help agents: switched on per company and role, with daily and monthly allowances. Agents on your records: bought per company; the model runs in the browser or on an AI box on your network.

Ask your first question in the 14-day pilot.

Sign up, then Help → Ask an agent.
