Atto Pharma®
MANUFACTURING SIMPLIFIED

eBMR
From Your BMR.
By Your Team.
In Weeks.

Your BMR. Your Team. Your Rollout.

Read the White Paper and see how Atto Pharma eBMR® puts digitalization in the hands of Manufacturing, Quality and IT.

Screens from Your BMR

Load your approved BMR (Word/PDF) and get eBMR screens, fields, limits, equipment and signatures instantly.

No Implementation Project

No custom development. Turn features on or off by configuration in less than a day.

Train at Your Pace

Built-in, role-based training with step-by-step modules and exams. Take it anytime, anywhere — on a phone, tablet or laptop. QA approves each certification.

Rehearse Before Go-Live

Run one or two batches with your own team on the development site. Everyone practices, gets confident and is ready for production.

One BMR, Multiple Uses

Extend an approved BMR to other process areas, equipment or a buyer's specification — with a reason, approval and change control.

The Change in Control

Typical MES Rollout (Project-Driven)	Atto Pharma eBMR (Plant-Driven)
☐ Rebuild each BMR	✓ Generate screens from your BMR
☐ Custom development	✓ No custom development
☐ Project-based validation	✓ Validate within your own PQ
☐ Scheduled, on-site training	✓ Self-paced, role-based training
☐ Months to value	✓ Same-day screens, weeks to go-live

The Business Impact

- Go live in weeks, not months
- Add the next product the same day
- Less for IT to run, security intact
- Lower cost, faster value realization
